## WORK EXPERIENCE

### UI WEB DEVELOPER

LIVEPURE POLYMER

Nov 2021 to Present

### PROJECT DESCRIPTION

ROBO-GST is an intuitive and user-friendly web application designed to streamline the process of filing Goods and Services Tax (GST) returns for businesses. The app aims to provide a hassle-free experience by offering a seamless platform for users to upload their GST-related documents, invoices, Excel files, and Tally files, simplifying the entire GST filing process.

### ROLES AND RESPONSIBILITY

- Design and developed Custom/Reusable Components
- Assessed UI designs for Technical feasibility
- Maintaining, optimizing, troubleshooting, and improving the website
- Daily maintenance of code, debugging issues, and solving client's problems
- Integrate API and Rendered components to work as expected
- Developed website mockups.
- Testing and implementing features and functionalities
- Actively participated in agile development methodologies, including daily stand-ups, sprint planning, and retrospectives.
- Worked closely with backend developers to integrate frontend and backend functionalities.
- Actively participated in code reviews and provided constructive feedback to improve the overall codebase.
- Resolved bugs and issues reported by users, maintaining a high level of responsiveness and attention to detail.

## WEB DEVELOPER

NOMOSOTS OUTSOURCING PVT. LTD.

June 2021 to Nov 2021

### PROJECT DESCRIPTION

The CRUD Customer Data Management App is a powerful and user-friendly web application designed to streamline the process of storing, managing, and accessing customer data. With its intuitive interface and robust functionality, the app allows businesses to efficiently organize and retrieve information about their customers, resulting in improved customer relationship management and enhanced operational efficiency.
